

COMICCRAFTAI

Project Title:

ComicCraftAI – AI-Powered Comic Story Creator

1. INTRODUCTION

Functional requirements describe the functions and services that ComicCraftAI must provide to its users.

2. USER INPUT

The system shall allow users to provide:

- Story prompt
- Character name
- Setting
- Tone
- Art style

3. COMIC OUTLINE GENERATION

The system shall send the user's story information to the generative AI service and generate a structured five-panel comic outline.

Each panel should contain information such as:

- Panel number
- Panel title
- Scene description
- Image prompt

4. STORY GENERATION

The system shall generate comic narration and dialogue for each panel.

Each story panel should contain:

- Panel number
- Caption
- Narration
- Dialogue

5. IMAGE GENERATION

The system shall generate an image for each comic panel based on the generated image prompt.

The system shall generate five panel images for a five-panel comic.

6. COMIC LAYOUT

The system shall combine:

- Panel information
- Scene descriptions
- Images
- Captions
- Narration
- Dialogue

into a structured comic layout.

7. COMIC PREVIEW

The system shall display the generated comic in a web browser.

The preview shall allow users to view the generated panels and associated text.

8. PDF GENERATION

The system shall generate a downloadable PDF containing the comic panels and their associated content.

9. ERROR HANDLING

The system shall handle errors related to:

- Missing input
- API failures
- Image generation failures
- Invalid AI responses
- PDF generation problems

10. DEPLOYMENT

The application shall be deployable as a web service so that users can access it through a browser.

11. SUMMARY

The functional requirements define the complete workflow from user input to final comic PDF generation.
