

COMICCRAFTAI

USER INTERFACE DESIGN

1. INTRODUCTION

ComicCraftAI provides a simple web-based interface that allows users to provide comic requirements and view the generated comic.

2. HOME PAGE

The home page contains the ComicCraftAI title and a comic generation form.

3. STORY PROMPT

The story prompt field allows the user to enter the main idea for the comic.

4. CHARACTER NAME

The character name field allows the user to specify the primary character.

5. SETTING

The setting field allows the user to specify where the story takes place.

6. TONE

The tone selection allows the user to choose the desired storytelling style.

Examples include:

- Funny
- Adventure
- Emotional
- Mystery
- Action

7. ART STYLE

The art style field allows the user to specify the desired visual style.

8. GENERATE COMIC BUTTON

The Generate Comic button submits the user's requirements to the backend.

9. COMIC PREVIEW PAGE

The preview page displays the generated five-panel comic.

Each panel contains:

- Panel title
- Generated image
- Scene description
- Caption
- Narration
- Dialogue

10. PDF DOWNLOAD

The preview page provides an option to download the generated comic as a PDF.

11. CONCLUSION

The UI design focuses on simplicity and allows users to create a comic without requiring technical knowledge.
