

COMICCRAFTAI

EMPATHY MAP

Project Title:

ComicCraftAI – AI-Powered Comic Story Creator

1. INTRODUCTION

An empathy map is used to understand the needs, thoughts, feelings, actions, and expectations of the intended users of ComicCraftAI.

The target users are people who are interested in creating comics but may not have professional drawing or comic-design skills.

2. TARGET USER

The primary target user is a beginner or creative individual who has a story idea and wants to convert that idea into an illustrated comic.

3. WHAT DOES THE USER SAY?

The user may say:

- “I have a story idea but I cannot draw.”
- “I want to create my own comic.”
- “I want an easy comic creation tool.”
- “I want AI to create the illustrations.”
- “I want to download my comic as a PDF.”

4. WHAT DOES THE USER THINK?

The user may think:

- “Can AI turn my idea into a comic?”
- “Can I create a comic without drawing skills?”
- “Will the generated images match my story?”
- “Can I easily download the finished comic?”
- “Can the process be completed using a simple interface?”

5. WHAT DOES THE USER FEEL?

The user may feel:

- Creative
- Curious
- Excited
- Interested in experimenting with AI

- Frustrated by traditional comic creation
- Motivated to visualize their stories

6. WHAT DOES THE USER DO?

The user may:

- Write story ideas.
- Search for comic creation tools.
- Experiment with AI tools.
- Create character descriptions.
- Search for suitable images.
- Try to arrange images and text manually.

7. USER PAIN POINTS

The major pain points include:

- Lack of drawing skills
- Lack of illustration skills
- Difficulty designing comic panels
- Time required for manual creation
- Difficulty writing dialogue
- Difficulty combining images and text
- Difficulty preparing a final comic document

8. USER NEEDS

The user needs:

- Simple user interface
- Easy story input
- Automated story generation
- Automated image generation
- Structured comic panels
- Comic preview
- PDF export
- Easy-to-understand workflow

9. OPPORTUNITY FOR COMICCRAFTAI

ComicCraftAI addresses these needs by providing an integrated AI-based workflow that converts user input into a five-panel illustrated comic.

10. CONCLUSION

The empathy analysis shows that users need a simple and accessible method to transform their creative ideas into comics. ComicCraftAI is designed around these needs by combining story generation, dialogue generation, image generation, comic layout, and PDF export.
