

COMICCRAFTAI

TEST CASES

1. INTRODUCTION

Testing is performed to verify that ComicCraftAI functions correctly and produces the expected results.

TEST CASE 1

Test ID: TC001

Test Name:
Home Page Loading

Input:
Open the ComicCraftAI application URL.

Expected Result:
The ComicCraftAI home page should load successfully.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 2

Test ID: TC002

Test Name:
Valid Story Input

Input:
Enter a valid story prompt, character name, setting, tone, and art style.

Expected Result:
The system should accept the input and start comic generation.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 3

Test ID: TC003

Test Name:
Comic Outline Generation

Input:
Submit valid comic information.

Expected Result:
The system should generate a five-panel outline.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 4

Test ID: TC004

Test Name:
Story Generation

Input:
Generated five-panel outline.

Expected Result:
The system should generate captions, narration, and dialogue.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 5

Test ID: TC005

Test Name:
Image Generation

Input:
Panel image prompts.

Expected Result:
Five comic panel images should be generated.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 6

Test ID: TC006

Test Name:
Comic Preview

Input:
Successfully generated comic.

Expected Result:
The comic should be displayed in the browser.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 7

Test ID: TC007

Test Name:
PDF Generation

Input:
Generated comic layout.

Expected Result:
A PDF file should be created.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 8

Test ID: TC008

Test Name:
PDF Download

Input:
Click the PDF download button.

Expected Result:
The generated PDF should open or download successfully.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 9

Test ID: TC009

Test Name:
Invalid API Configuration

Input:
Invalid or missing API configuration.

Expected Result:
The system should display or log an appropriate error instead of silently failing.

Actual Result:
To be filled after testing.

Status:
To be filled after testing.

TEST CASE 10

Test ID: TC010

Test Name:
Deployment

Input:
Open the deployed application URL.

Expected Result:
The application should be accessible through the browser.

Actual Result:

To be filled after testing.

Status:

To be filled after testing.
